

AMENDMENTS TO THE CLAIMS

1 (currently amended): A method for removing calcium from water containing a ~~high~~ concentration of calcium bicarbonate, the concentration of calcium bicarbonates being at least about 200ppm, comprising the steps of:

5 adding calcium hydroxide to waste water containing a ~~high~~ concentration of at least about 200ppm of calcium in a form of calcium bicarbonate, the quantity of calcium hydroxide to be added ranging in 75 to 125% of the equivalent weight to calcium; and

10 removing the calcium ~~by fixing it to~~ precipitation thereof in the form of calcium carbonate.

2 (canceled)

3 (currently amended): A method for removing calcium from water containing a ~~high~~ concentration of calcium bicarbonate claimed according to claim 1, in which the quantity of calcium hydroxide to be added ranges in 90 to 110% of the equivalent
5 weight to calcium.

4 (currently amended): A method for removing calcium from water containing a ~~high~~ concentration of calcium bicarbonate claimed according to claim 1, further comprising the step of

AMENDMENTS TO THE CLAIMS

defluorination by adding calcium carbonate to primary waste water
5 containing HF.

5 (currently amended): A method for removing calcium from
water containing a ~~high~~ concentration of calcium bicarbonate
claimed according to claim 1, in which the water contains about
200ppm to 500ppm of said calcium bicarbonate of 200ppm or more.

6 (currently amended): A method for removing calcium from
water containing a ~~high~~ concentration of calcium bicarbonate
~~claimed according to claim 1 in which~~ , the concentration of
calcium bicarbonate being at least about 200 ppm, comprising the
5 steps of:

adding calcium hydroxide to waste water containing a
concentration of at least about 200 ppm of calcium in a form of
calcium bicarbonate;

said adding step ~~comprises~~ including that the calcium
10 hydroxide added causes the pH of the waste water to range from
8.5 to 10.5; and

removing the calcium by precipitation thereof in the form of
calcium carbonate.

7 (currently amended): A method for removing calcium from
water containing a ~~high~~ concentration of calcium bicarbonate

AMENDMENTS TO THE CLAIMS

claimed according to claim [[2]] 1, further comprising the step
of defluorination by adding calcium carbonate to primary waste
water containing HF.

8 (currently amended): A method for removing calcium from
water containing a ~~high~~ concentration of calcium bicarbonate
claimed according to claim [[3]] 6, further comprising the step
of defluorination by adding calcium carbonate to primary waste
water containing HF.

9 (currently amended): A method for removing calcium from
water containing a ~~high~~ concentration of calcium bicarbonate
claimed according to claim [[2]] 6, in which the water contains
said calcium bicarbonate of 200ppm or more.

10 (currently amended): A method for removing calcium from
water containing a ~~high~~ concentration of calcium bicarbonate
claimed according to claim [[3]] 9, in which the water contains
said calcium bicarbonate of about 200ppm or more to about 500ppm.

11 (canceled)

12 (canceled)

13 (currently amended): A method for removing calcium from
water containing a ~~high~~ concentration of calcium bicarbonate

AMENDMENTS TO THE CLAIMS

claimed according to claim 8, in which the water contains said calcium bicarbonate of about 200ppm or more to about 500ppm.

14 (currently amended): A method for removing calcium from water containing a ~~high~~ concentration of calcium bicarbonate claimed according to claim [[2]] 1 in which said adding step comprises that the calcium hydroxide added causes the pH of the waste water to range from 8.5 to 10.5.

15 (currently amended): A method for removing calcium from water containing a ~~high~~ concentration of calcium bicarbonate claimed according to claim 3 in which said adding step comprises that the calcium hydroxide added causes the pH of the waste water to range from 8.5 to 10.5.

16 (currently amended): A method for removing calcium from water containing a ~~high~~ concentration of calcium bicarbonate claimed according to claim 4 in which said adding step comprises that the calcium hydroxide added causes the pH of the waste water to range from 8.5 to 10.5.

17 (currently amended): A method for removing calcium from water containing a ~~high~~ concentration of calcium bicarbonate claimed according to claim 5 in which said adding step comprises

Application No.: 09/890,470
Amendment Dated July 22, 2003
Reply to Office Action dated: February 26, 2003

Attorney Docket No.: FUK-85

AMENDMENTS TO THE CLAIMS

that the calcium hydroxide added causes the pH of the waste water
to range from 8.5 to 10.5.

18-20 (canceled)
